

Welcome to *Hearing Review Products'* ongoing series of **Technology Guide** product surveys. We kicked off this new matrix feature in October by going in depth with RIC/RITE hearing aids, and for the November/December issue we profiled a wide variety of thin-tube / slim-tube instruments. This month you'll find we've pulled together conventional hearing aids (featuring No. 13 tubing or Libby horn) from the industry's top manufacturers. Beyond what's presented on these following pages, there are more to be found on our Web site, [www.hearingreview.com](http://www.hearingreview.com), where you can download PDFs of this complete survey as well as the previous two.
