

Welcome to *Hearing Review Products'* continuing series of **Technology Guide** product surveys. Kicking off in October, we've spent the last four issues profiling varieties of BTEs. With this matrix, you'll find we've gotten out from behind the ear and gone on the inside with a broad spectrum of full- and half-shell ITEs from many of today's top manufacturers.

But beyond what's presented on these following pages, there are more instruments to be found on our Web site, www.hearingreview.com, where you can download PDFs of this complete survey as well as the previous four.
