

LANTOS BY THE NUMBERS

OUR VISION: TO REPLACE EARMOLD IMPRESSIONS WITH SCANNING TECHNOLOGY

22,000⁺ PEOPLE SCANNED

BY THE LANTOS 3D EAR SCANNING SYSTEM across a diverse set of age groups, geographies, and hearing conditions without a single adverse event.

Lantos 3D Ear Scanning System is the **only FDA 510K cleared** and registered ear scanning device.

3,100,000
Earmold impressions taken globally each year.

9 out of **10**

people prefer scanning to earmold impressions

1,000,000+ DATA POINTS

captured per ear by the Lantos 3D Ear Scanning System. Individual images are captured and converted through a proprietary algorithm to generate an accurate real-time 3D model of the full ear.

4,700
DEVICES MADE

from Lantos scans for hearing aids, professional audio, consumer audio and hearing protection.

ONE SCAN. ENDLESS DEVICES.

A single Lantos Scan can generate a truly limitless array of custom hearing devices.
